EdgeMax In-Ceiling Loudspeakers

The EdgeMax series provides in-ceiling loudspeakers with the superior coverage patterns typical of larger surface-mount speakers, thanks to our exclusive PhaseGuide technology. EdgeMax loudspeakers project high-frequency sound throughout rooms up to 20' x 20' from corners and walls, eliminating the need

for conventional ceiling speakers cluttering the center of the room.

All models include the same 1.3" tweeter and 8" woofer, and provide 105° coverage when corner-mounted and 120° coverage when wall-mounted. Available in both black and white, they blend discreetly into any space.

Note: EdgeMax prices reflect April 2025 price increase of 5% on all models.

SKU	Model	Description	Frequency Range	MSRP GBP	MSRP USD	Dealer Cost	Status
-----	-------	-------------	-----------------	----------	----------	-------------	--------

EM90-B	EdgeMax EM90	Premium in-ceiling loudspeaker, 90° coverage, black	60 Hz - 18 kHz	£799.00	\$949.00	\$664.30	Active
